

# Kurio Updates and Enhancements

## December 2011

Available Now on Kurio:

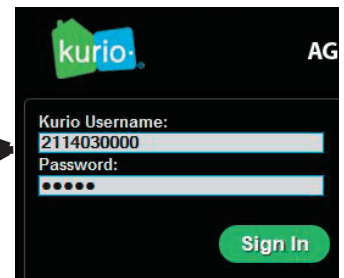

### 1) Smart Search has “Address Active” option

- This is in addition to the MLS #, Agent Name, and “Address All Statuses” options
- Address Active searches return only Active and Contingent (all 3) listings
- This will prevent off market (UC, EXP, etc) listings from cluttering search results

### 2) Dual Authentication option

- Agents can now log into Kurio with EITHER their Kurio Password or their MLS password to login to Kurio
- Kurio users must still register prior to using Kurio
- Users still have to create their 4 character (or more) Kurio Username/Password
- When Tempo Password changes (quarterly), Kurio will still require verification of new Tempo password prior to logging in

### 3) Listing Searches (including Smart Search) now return 200 matches

- previous limit of 100 listings returned has been doubled

### 4) Smart Search MLS#(s) allows MULTIPLE MLS numbers

- previously, only a single MLS number could be entered.
- At least 16 MLS numbers can be entered at a time (possibly more)

- MLS numbers separated by a comma, no space. (just like Tempo)

### 5) Virtual Tour link on Details page

- User can click on the link to see the Virtual Tour (if entered by listings agent)

### 6) Smart Search “Address Active” set as DEFAULT search option

- other options still available: MLS #, Agent Name, and “Address All Statuses”
- Default searches will return only Active and Contingent (all 3) listings

### 7) Default Homepage setting

- Will allow user to define startup page when logging in
- User will be able to make the search screen the default in lieu of “New Today”

Coming 2012:

### 1) CMA's

- no specific information yet available

### 2) Graphical User Interface overhaul

- more options and more up-to-date navigation
