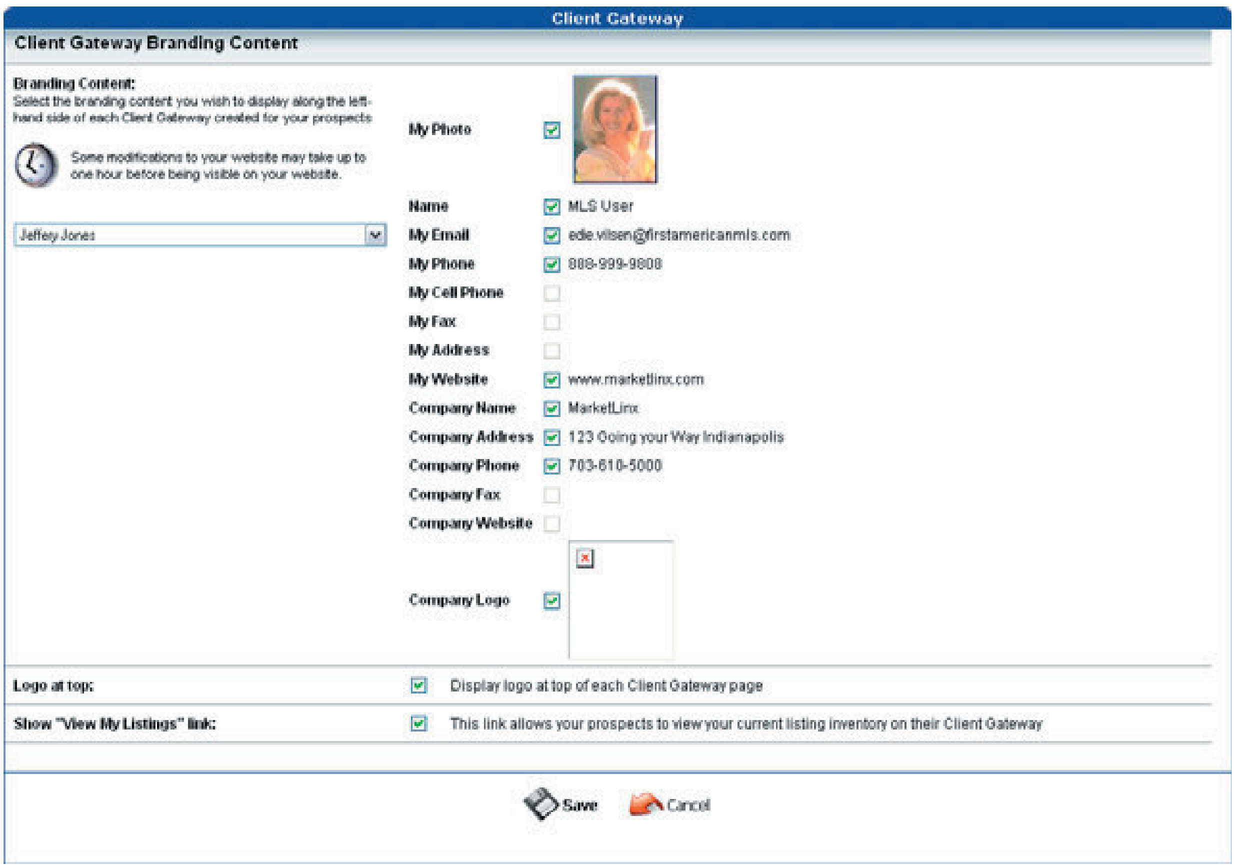
Client Gateway

Use the built-in features and controls in TEMPO 5 to easily set up and manage the appearance and content of your client gateways. A client gateway, used in conjunction with your own vanity domain, presents an opportunity to reach your target prospects. Using the client gateway, prospects can access properties that interest them, e-mail you, and check your Web site. See *"Branding Your Web Site" on page 204*.

To specify branding content on your client gateway:

1. In the My Preferences & Settings navigation bar, click **Client Gateway**.

   The Client Gateway page opens.



NOTE! *The clock icon indicates that any changes made to your Web site may take up to one hour before taking effect.*

2. Select the check boxes of the name and contact elements you want included, such as **My Photo**, **My Email**, **Company Logo**, etc.

   NOTE! *If a field has not been completed on the Contact Information page, the information is not available for inclusion on the Client Gateway. For example,* ***My Fax*** *is unavailable because no fax number has been specified on the Contact Information page.*

3. Select the **Logo at top** check box to display your logo at the top of each Client Gateway page.
4. Select the **Show "View My Listings" link** check box to enable your prospects to view your current listings inventory on the Client Gateway.
5. Click **Save**.

▶ To preview the Client Gateway settings:

1. Click the drop-down list (just under the clock symbol) and select the name of a prospect.

   The Web site opens in a new browser window.
2. Check to see how the links work and how the page will appear to a client.
